

Hamilton Health Sciences

Satellite Health Facility

ACTIVELY RECRUITING FOR

ADDRESS

2150 King St. E.
Hamilton, ON
L8N 1B2

ABOUT

The SHF is for patients who no longer require hospital care, but who need health care support until they can safely transition to another location in the community.

It is an extension of both hospitals, and staffed by an interprofessional team of health care providers and primary care physicians. As always, our goal is to provide quality care for patients in a safe setting, while supporting the needs of our community throughout the COVID-19 pandemic.

Patient Support - Satellite Health Facility Assistant

Volunteers are to help enhance the patient experience and service delivery by a variety of means such as providing companionship to patients to provide social and cognitive stimulation, assist with therapeutic recreation activities whether it be small group, or, taking patients outside and providing assistance to Therapy staff through the following of both Patient and Therapy staff with an assistive device.

Monday - Friday, 1:00pm-4:00pm

HOSPITAL FACTS

The SHF helps our hospitals:

- Support patients who are waiting for care in the community;
- Reserve hospital space for those with urgent medical needs;
- Continue to reintroduce clinical services impacted by the pandemic;
- Maintain capacity to care for COVID-19 patients should there be a surge in cases.
